## Product Summary

### OVERVIEW

Name: ELEMENTS

Yacht Type: Motor Yacht

Class: LR, PYC

Builder: Yachtley Shipyard, Turkey

Exterior Designer: Alpha Marine Ltd

Interior Designer: Cristiano Gatto Design

### DIMENSIONS

Length Overall: 80.00m (262ft 5in)

Beam: 13.00m (42ft 7in)

Max Draft: 3.80m (12ft 50in)

Gross Tonnage: 2443

### PERFORMANCE & CAPACITIES

Max Speed: 20 Knots (approx)

Cruising Speed: 13 Knots (approx)

Range (nm): 8000@ 14knts

Engines: 2 X MTU 3000 HP

Generators: 3x500 kVA Power converter: Exendis 7x50 Watts = 350 kW (water cooled)

## **MATERIALS**

Hull: Steel

## **ACCOMMODATION**

Guests: 24

Cabins: 12

Crew: 29

## Product Description

Elements is one the world's few purpose-built SOLAS yachts and is a superyacht of refined splendor. Elements was delivered in 2019 and this 80m motor yacht is offered for sale in brand new condition and low engine hours.

Elements has been custom-built to Lloyd's classification, with unrestricted SOLAS navigation, and is also compliant with commercial operation. The yacht has two pairs of stabilizers for comfort, is able to take a helicopter and has a 7,000nm range at a cruising speed of 13.5 knots.

This incredibly capable ocean-going vessel has a voluminous interior, designed by Cristiano Gatto. Mixing contemporary exterior styling with a more classic interior, Elements' decor features precious marbles, rich fabrics, hand-tufted carpets and intricately adorned ceilings, with many further details accentuating the elegance of each room including gold, silver and mother of pearl inlays.

Unique design features are found on every deck, including elegant Grecian-style pillars in the main saloon and the master suite, etched mirrored glass detailing and chandeliers in fine-cut crystal.

On the main deck, the saloon is the heart of the yacht and is the natural place for guests to gather. Entering from the aft deck, one is immediately struck by the backlit onyx wall panels and the intricate marble flooring. Rather than one single

lounging area, the saloon offers a variety of sitting areas conducive to smaller groups pursuing different activities at once.

Moving forward through the main lobby, there's a glass lift and one enters the main guest area which houses nine of Elements' 12 suites. One level above, the owner's deck is laid out as a private apartment with two large VIP suites each with luxury bathrooms, an office, and a cinema room, and an astonishingly luxurious owner's stateroom. The owner's suite opens onto a panoramic foredeck with a Jacuzzi pool and the helipad is on the bow, where a private helicopter can land in utmost privacy.

In total, Elements has accommodation for 24 guests, comprising the master suite, two VIP staterooms, four double staterooms, four twin cabins, and one smaller twin cabin.

Boarding Elements via the transom or large side platform, guests are welcomed into a 140sq.m beach club with chaise-lounges and a white and gold mosaic-finish bar. Also located on this deck is the wellness Centre with a gym, hammam spa with traditional goebetkas and a massage room.

From the beach club guests have direct access to the tender garages (housing a 8.4m limousine tender and two SOLAS approved rescue tenders) and the saloon on the main deck.
